

## TOP 5 MISTAKES TO AVOID WHEN BUYING A HOT TUB

A hot tub is an investment that you will live with for years to come. In our 29 years in business, we often see these top 5 mistakes that can easily be avoided with a little time and attention.

### 1. NOT ACCOUNTING FOR SIZE AND SPACE

Be sure to take measurements of the space where your hot tub will be, as well as the access path you will use to install it. A Site Survey by your dealership before delivery will help you avoid measuring issues that can hold up your installation and get you into your hot tub sooner.

### 2. UNDERESTIMATING THE VALUE OF AN ENERGY EFFICIENT HOT TUB

Energy efficient spas save you money month after month and year after year. Be sure to speak to a sales associate and read reviews about energy efficient models.

### 3. FAILING TO GET CLEAR ON HOT TUB MAINTANANCE

Like a car or pool, a hot tub requires regular maintenance to function at its absolute best. Choose a dealership that offers orientation training and support so you know what to do for your family's safety and to keep your hot tub functioning at its best for years to come.

### 4. PLANNING A 'DIY' INSTALLATION OF THE TUB

Unless you're a trained professional, you'll want a certified dealer to make sure your new hot tub is installed correctly, which can save you money in repairs down the road. Additionally, certified dealers have the proper equipment to safely lift and move the heavy tub to the precise spot you have prepared for it.

### 5. FORGETTING TO CONSIDER WHO WILL SERVICE YOUR HOT TUB

A 5-star in-house service team will respond quickly to your needs and give you consistent enjoyment of your hot tub. Ask your dealer about their service department and go online to see reviews from their current customers.
